What

Autopay is a Fast & Secure, Web & API based disbursement solution.

Autopay allows businesses to make **real-time, single or bulk payments** at anytime, anywhere.

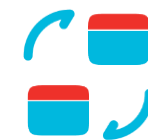

Why Autopay?

Autopay combines a key set of features that make it safe and convenient to disburse funds.

**Cost Effective**

Lower transaction fees compared to other forms of disbursements such as RTGS, EFT, & cheques

**Real Time**

With realtime capabilities, our platform ensures funds are available exactly when you need them.

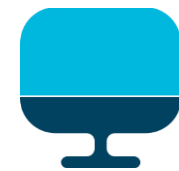

**Bank-Grade Security**

Rest easy knowing all transactions are protected by cutting-edge encryption and security protocols.

**Anytime, Anywhere**

Access funds and initiate transactions from your home, office or even on the go, at anytime.

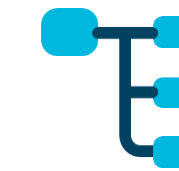

Two Integrations, **One** Autopay.

Web Portal

Our web portal offers an intuitive interface, allowing users to easily manage transactions, view account balances, and initiate disbursements with just a few clicks.

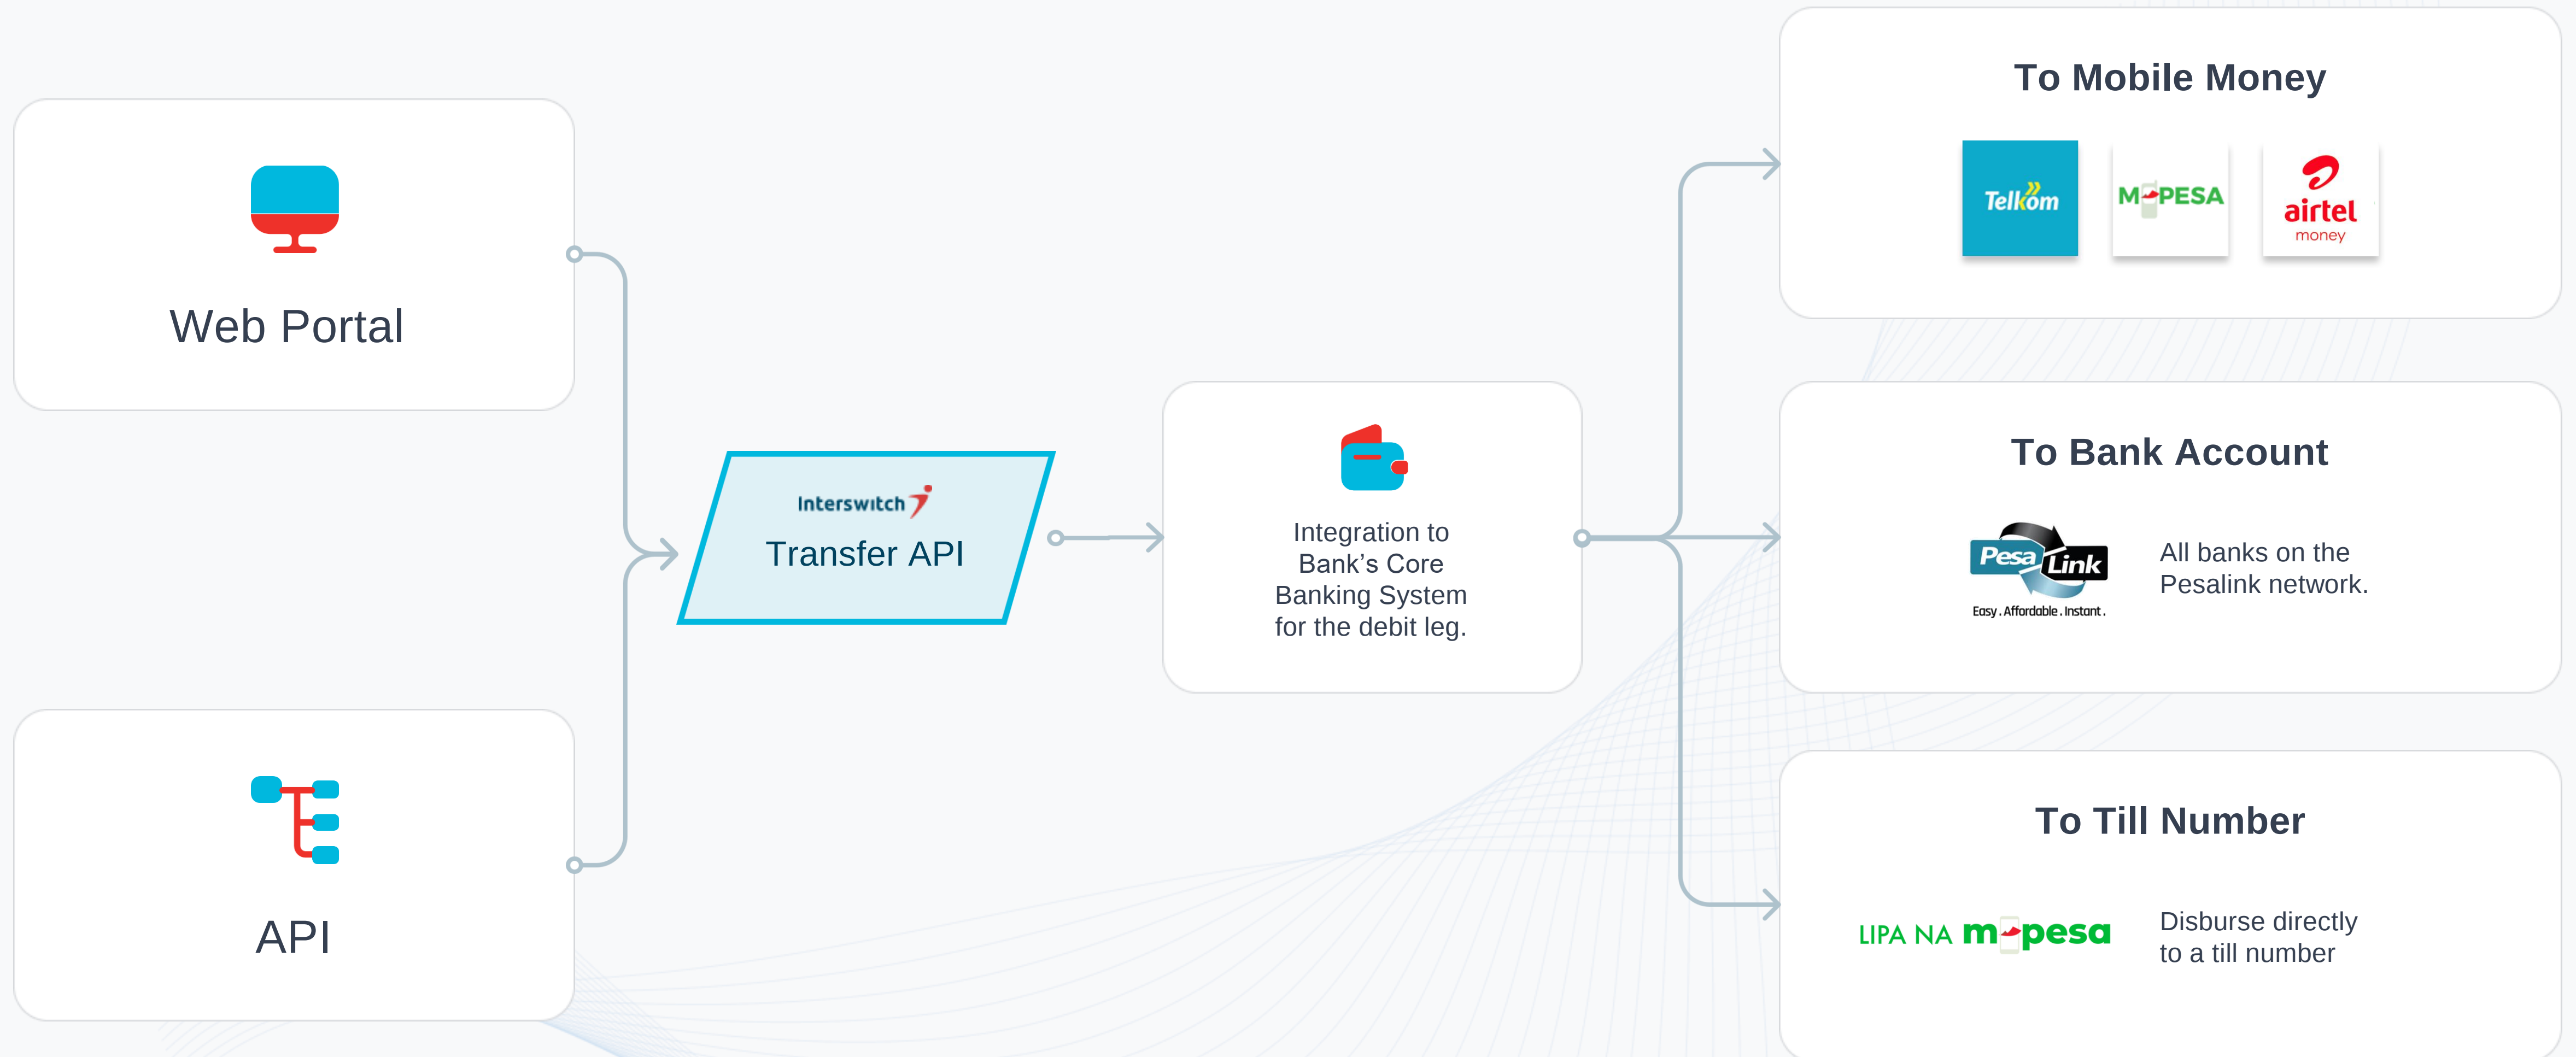

OR

API

Our API allows you to seamlessly integrate our payment platform into your existing systems, enabling you to leverage its capabilities without disrupting your workflow.

Who is the Key Target Market?

Ideally, any business can use Autopay to make payments out. The below sectors that are high transactions in nature and some whose core business is disbursements are greater beneficiaries of the Bulk Upload feature, the instant credits and the cost savings thereof...
